Study Author & Year
(e.g. Stent et al. 1981)

Additional Notes?
(Particular quirks about this study or anything important that wasn't captured)

Over what period of time did water level DECREASE occur?
Check only one box UNLESS multiple water level decreases

- [ ] Less than 2 days
- [ ] Less than a week but more than 2 days
- [ ] More than a week but less than a month
- [ ] More than a month but less than 3 months
- [ ] More than 3 months but less than 7 months
- [ ] More than 7 months but less than a year
- [ ] More than a year
- [ ] Variable (multiple water level decreases of different time spans)
- [ ] Multiple water level decreases (same time span)

Estimate the rate of water level DECREASE
in meters per unit of time, e.g. meters per day or 10m over 2 months

Estimate the rate of water volume DECREASE
in cubic meters per unit of time, e.g. meters3 per day or 10m3 over 2 months

Was the DECREASE a seasonal response?

- ( ) Yes
- ( ) No
- ( ) Unclear

Put in text as much description as you can about water level DECREASES in this study.

Over what period of time did water level INCREASE occur?

- [ ] Less than 2 days
- [ ] Less than a week but more than 2 days
- [ ] More than a week but less than a month
- [ ] More than a month but less than 3 months
- [ ] More than 3 months but less than 7 months
- [ ] More than 7 months but less than a year
- [ ] More than a year
- [ ] Variable (multiple water level increases of different time spans)
- [ ] Multiple water level increases of roughly the same duration

- No
- Unclear, see additional information

+ Aa Put in text as much description as you can about w

+ Did the paper disentangle seasonal effects from wa
  - Yes, statistically disentangles seasonal effects
  - Yes, multiple years
  - No

+ Aa Provide any information you can about whether the

+ Did the authors report that their chlorophyll/phytop
  - Yes
  - Not significant
  - Not tested
  - There were multiple tests, see notes below

+ Aa Notes on statistical findings

+ Were there significant (statistically tested) differen
  - Yes, I've described the data and findings below
  - No

+ Aa Describe these differences and how they differed w

+ Does this waterbody experience a rapid refill / floo
  - Yes
  - No

+ ⊞ Table

+ Aa Necessary notes about measurements

Estimate the rate of water level INCREASE

in meters per unit of time, e.g. meters per day or 10m over 2 months

Estimate the rate of water level INCREASE

in cubic meters per unit of time, e.g. meters3 per day or 10m3 over 2 months

Was the INCREASE a seasonal response?

- ○ Yes
- ○ No
- ○ Unclear, see additional information

Put in text as much description as you can about water level INCREASES in this study.

Did the paper disentangle seasonal effects from water level change effects and/or does this paper include multiple years of data with at least one year in a given condition? (select all that apply)

- ☐ Yes, statistically disentangles seasonal effects
- ☐ Yes, multiple years
- ☐ No

Provide any information you can about whether the water level change was due to regular seasonal/annual water level changes or if it was beyond a regular seasonal/annual change

e.g. Water level change was during the time it was expected to be seasonally, but was more extreme than a regular seasonal change (5m lower than normal from previous 10yrs average).

Did the authors report that their chlorophyll/phytoplankton/cyanobacteria finding was statistically significant?

- ○ Yes
- ○ Not significant
- ○ Not tested
- ○ There were multiple tests, see notes below

Notes on statistical findings

Were there significant (statistically tested) differences in potential drivers between different water level conditions in this study that would help explain phytoplankton / cyanobacteria dynamics?

If yes, describe the data and findings (particularly direction) below!

- ○ Yes, I've described the data and findings below
- ○ No

Describe these differences and how they differed with water level increase/decrease (was it significant and in what direction - wli/wld)

Important variables:

Water level, water temperature, light, turbidity, TSS, transparency

TN, TP, NH4, conductivity, NO3, pH, SRP, ortho-P,

DO, NO2

Does this waterbody experience a rapid refill / flooding following a decline in water level?

- Yes
- No

What was the cause of the rapid refill?

Did this study assess effect sizes of water level change on phytoplankton/cyanobacteria?

- Yes
- No
- Other
